take advantage of it. If you're not a member you can sign up for a free trial of Amazon Prime or wait until they offer free subscriptions, which they do from time to time for special groups of people like moms or students.

Java Oracle Application Server Documentation

Description. The `java` command starts a Java application. It does this by starting the Java Runtime Environment (JRE), loading the specified class, and calling that class's `main()` method. The method must be declared `public` and `static`, it must not return any value, and it must accept a `String` array as a parameter. The method declaration has the following form:

java - Oracle

Figure 1-2 shows a Java client application using a JDBC OCI driver and an Oracle Database server. The Java client application makes calls to the JDBC OCI driver, which translates the

Online Library Java Oracle Application Server Documentation

JDBC calls directly into the Oracle Net layer. The client then uses Oracle Net to communicate with Oracle Database that is also configured with Oracle Net.

Introducing Oracle Net Services - docs.oracle.com

1.1 Introduction to OC4J. Oracle Application Server provides a complete Java 2 Enterprise Edition (J2EE) environment written entirely in Java that executes in the Java virtual machine (JVM) of the standard Java Development Kit (JDK). You can run Oracle Application Server Containers for J2EE (OC4J) on the standard JDK that exists on your operating system.

Oracle Application Server 10g Release 3 (10.1.3.1.0) - Welcome

Oracle's GraalVM, a universal virtual machine for running applications written in Java, JavaScript and other programming languages, helps boost application performance. A year after its initial production release, GraalVM has gained purchase in the market.

Oracle's GraalVM finds its place in Java app ecosystem

However, for this project we don't need a Java EE application server, and we don't even need our own server. For this project, we will make use of the Oracle Application Container Cloud service, which provides preconfigured containers that run Java SE applications. Yes, you read that correctly: Java SE is enough for this kind of application.
